

1. Accomplishments
 - a. Created menu screen which contains:
 - i. An image
 - ii. A button
 - b. Creating a second image view which holds:
 - i. A text label
 - c. A segue between the first view (a.) and the second view (b.)
 - d. The button is what accomplishes the segue (c.).
 - e. We have created a database...but we're probably not gonna use it.
2. Timeline progress
 - a. Proposal accepted - Check
 - b. Database set up - Check
 - c. Repository and first commit - Check
 - d. Tournament Screen - Check
 - e. Scene Selection Screen - No
3. Updated Goals
 - a. We are not nearly as ambitious now. We are probably going to eliminate:
 - i. Making a database
 - ii. Simulating a tournament
 - b. At this point, we would be happy with having 16 teams on a screen, and selecting one and saying that is the winner!
 - c. If we're ambitious, you can select a team and it will segue to a screen with information on that team.
 - d. Is this enough?
4. Revised Timeline
 - a. Updated goals to be week after Easter Break
 - b. Have screen with 16 teams to be completed that week too
 - c. Have selection of team the next week and possible transitions to team information.
